

EVANS

PREP FLUID

**Preparatory engine flush for use
with all Evans Waterless Coolants**

Formulated to hygroscopically absorb water whilst flushing
loose dirt and scale from your cooling system

Flushing the cooling system

1. Drain existing coolant from entire cooling system, including heater and all hoses.
2. Fill with EVANS Prep Fluid to flush out loose dirt, scale and residual coolant.
3. Run engine until normal operating temperature is reached. Allow to cool and drain the system.
4. Refill with the appropriate Evans Waterless Coolant.

For more technical details/information visit www.evanscoolants.co.uk

Caution:

Never work on a hot system, allow engine to cool before commencing work.

5L

DeTox™

This product contains Evans patented DeTox™ additive and has been classified as Non-Toxic by an EPA certified laboratory. However as with all chemicals, do not consume, keep away from children, avoid contact with eyes and skin. Thoroughly rinse hands and eyes with water after incidental contact.
